the driver did not deserve that either; he had been nothing but helpful and friendly.

yes, i had the horrible leg pain too

he organized a project to tag whale sharks

an ultrasound done at 5 to 7 weeks would most likely determine if you are carrying twins, but there usually has to be some reason for an early ultrasound

if the pilot in command is in compliance with 121.435 or 121.436, as applicable, and 121.439 of this
