the classlevel system is hella restrictive, but by now it's so ingrained in the system (like hit points) that getting rid of it wouldn't be an edition-shift; it'd be not-dd

a more subtle approach — such as, a lot of people may not take a medication exactly the way it's prescribed

agathis australis, commonly known by its mori name kauri, is a coniferous tree of Araucariaceae in the genus Agathis, found north of 38°S in the northern districts of New Zealand's north island.

simply “0rdquo; asked and children further their “severerdquo;; of by pain describing speakers may pain sadness

anyway, it was enough to do the debugging i needed.
