i may use baking soda in the washing machine as fabric softener, but i still recognize it breaks down clothing fibers; which is why there's a lint filter that has to be cleaned.

and three: the only way we can break the mob is to stop letting them get away with murder

so how can hiv antibodies mean you're sick in the first instance, but simultaneously those same antibodies mean you're well if they appeared after a vaccine?

i am impressed by the details that you have on this site
